

Kovtun Oleksandr

Frontend Developer

Profile

Passionate about accessibility.

Love playing around with new tech and diving into it's source code.

Despite being shy, somehow managed to be a conference speaker. Even more than once.

Strong believer that best way to learn is practice. So I build lot's of dumb stuff.

Education

Vinnitsia National Technical University

Information security management

Master's degree

Recent Talks

- Reactive programming. Svelte way.
- Modern debugging.
